If contact is likely, safety glasses are recommended.
- Hand Protection  
As specific work environments and material handling practices vary, safety procedures should be developed for each intended application. The correct choice of protective gloves depends upon the chemicals being handled and the conditions of work and use.  
Recommended: Nitrile or alternative suitable glove.  
Breakthrough time represents how long a glove can be expected to provide effective permeation resistance. Always consult with your glove supplier for up-to-date technical information on breakthrough.
- Respiratory Protection  
No special requirements under ordinary conditions of use and with adequate ventilation.
- Skin and Body Protection  
Wear appropriate clothing as protection against splashing.  
In accordance with good industrial hygiene practices, precautions should be taken to avoid skin contact.
